

## REMARKS

This application is being filed as a continuation of Application No. 08/923,061 in order to claim a method of endovascular occlusion. The application filed herewith includes new claims 1-20 which are directed to said method. The claims of the parent application have not been resubmitted. The Title and the first sentence of the application (i.e., the claim to priority) have also been updated in the filed application. The amendments to the specification which have been submitted above reflect that a method is now being claimed as contrasted to the device which was claimed in the parent application. The amendments do not introduce any new matter into the specification.

Respectfully submitted,

---
